Gary-

I talked to Mike Cunningham, our compliance coordinator at Bayport, and he is currently reviewing a profile for USOR's South Tank 7 from Lonestar. Mike is checking to confirm whether or not we have received the South Tank 8, North Tank 8 and North Tank 7 profiles that you inquired about. I will let you know. I have copied Mike and Scott Harris, Bayport plant manager on this email.

Thank you.

Greg:

We are shipping contaminated oily water to you guys through Lonestar Ecology. We seem to be have trouble with getting final approval on a waste stream due to your approval system being down. It has apparently been verbally approved but until it gets into your system we can't ship. Is there a chance you can push this through so we can begin moving this material?

Thanks

Gary Moore
